Carburetor problems generally fall into three areas: too lean a mixture, too rich a mixture, or an incorrect adjustment. Luckily there are telltale symptoms that will tell you which problem you're dealing with. Carburetors are relatively simple devices.

How to Diagnose Carburetor Problems

Download Free Carburetor Troubleshooting in Your Motorcycle

If the engine is emitting black smoke, this could mean that the air filter is dirty, the fuel could have gone bad, and/or the carburetor is flooded. Start by checking your air filter, if it looks okay, move onto replacing the gas. If the problem continues, refer to the following for cleaning/replacing your Carburetor.
