Chapter 6: Volcanoes. Section 2: Volcanic activity. Objectives: Describe what happens when a volcano erupts. Explain how the two types of volcanic eruptions differ depending on the characteristic magma. Identify some hazards of volcanoes. Identify types of volcanic activity other than eruptions. Key Terms

Chapter 6: Volcanoes

Recall from Chapter 2 that magma is molten, liquid rock material found underground and forms igneous rocks. Magma rises up to Earth's surface because its density is less than the rock through which it moves. When magma rises to Earth's surface it is called lava. Volcanoes can cause the eruption of liquid, gas, or solid materials.
