How can human service professionals promote change? ... The cases in this book are inspired by real situations and are designed to encourage the reader to get low cost and fast access of books.

High Balls And Happy Hours

The highball can be a very light drink and that's why it is ideal for happy hour. It all depends on how much soda and whiskey you pour. For example, if you pour an 80-proof whiskey and follow the recipe as given, your drink would have an alcohol content of about 9 percent ABV (18 proof). Then again, if you double up on the whiskey, opt for a high-proof whiskey, or pour less ginger ale, the drink can almost double to 18 percent ABV.
