A cognitive theory of multimedia learning assumes that the human information processing system includes dual channels for visual/pictorial and auditory/verbal processing, that each channel has limited capacity for processing, and that active learning entails carrying out a coordinated set of cognitive processes during learning.

EDUCATIONAL MULTIMEDIA AND LEARNING STYLE PREFERENCES Dr ...

The role of multimedia and technology in learning specifically computer technology in the classroom is significantly important. For instance, one of the important roles is: "creating media and links by using a computer. It allows students to create multimedia projects in which links comes' a live" (Agnew, Kellerman, & Meyer, 1996).

There are normally two types of training media within a learning program. The first is the instructional setting or major media. For example, you might have your learners go to classroom training for 2 days or have an elearning program delivered to them. The second is the delivery systems within the major medium.

Instructional Design: Media, Strategies, and Methods

Since the multimodal learning style involves a combination of learning modalities, multimodal learning strategies require strategies from each style. Multimodal learning incorporates multimedia and uses different strategies at once. An ideal multimodal learning environment would incorporate as many of the above strategies as possible.

Essential to the cognitive theory of multimedia learning (CTML) is the notion that the brain processes information using two discrete channels and two discrete memory paths (Mayer & Moreno, 1998). According to Mayer and Moreno, the verbal (auditory) channel is responsible for processing music, sound accompanying video, and spoken words.

Multimedia Learning - an overview | ScienceDirect Topics

One disadvantage of a pre-test might have been that it would have influenced the actual purpose of the method (unbiased, spontaneous game-playing while automatically and unconsciously learning new vocabulary). With a pre-test the students would have known that we are focussing on their knowledge of vocabulary. Therefore, it is likely that they ...
