voltage), and 2. Current. Current is the actual flow of charged carriers, while difference in potential is the force that causes that flow. As we will see, potential is a single-valued function that may be uniquely ...

6.061 Class Notes, Chapter 1: Review of Network Theory

Network theory is the study of graphs as a representation of either symmetric relations or asymmetric relations between discrete objects. In computer science and network science, network theory is a part of graph theory: a network can be defined as a graph in which nodes and/or edges have attributes (e.g. names).. Network theory has applications in many disciplines including statistical ...
