Timeslicing - Wikipedia

"A time slice is more than a photograph. A time slice takes a series of photographs and combines them into one single image. It takes slices of the same photograph offset in time from several seconds up to a few minutes."

How Do You Make a Time Slice Photo? - PictureCorrect

Answer: Time slicing is a scheduling mechanism/way used in time sharing systems. It is also termed as Round Robin scheduling. The aim of Round Robin scheduling or time slicing scheduling is to give all processes an equal opportunity to use CPU. In this type of scheduling, CPU time is divided into slices that are to be allocated to ready processes.

OS Process Scheduling Q & A #2 - Tutorialspoint

Creating a Time Slice by Dan Marker-Moore A Time Slice is an image built from the photos of a timelapse. Each slice is a photograph taken at a different point in time, usually a few minutes after the previous slice. All the Time Slice images are unique, made from a different number of images, over a different amount of time.
