Make its enclosure like its natural habitat. Provide alfalfa and other grasses for it to graze on. Keep a shallow pan of water available for drinking, but make sure the tortoise does not get stuck in it. In the wild, tortoises dig in the dirt to lay eggs, so provide bare ground for digging in its pen.

If you want to raise a sulcata tortoise and a leopard tortoise, it is best if you keep them separate. Keep babies in separate enclosures, and house adults in separate parts of your yard. There are many reasons why you should NOT mix tortoise species. Bacteria that is normal in one species may be fatal to the other.

typically do well in
stuffed, small
enclosures. Once you
add the water dish,
food bowl, hides and
any decorations, there
isn't a lot of walking
room. Even a 4-foot by
8-foot enclosure can
become too small in a
year or two. Adults
need an outdoor space
of about 16-foot by
20-foot.

In cold climates, a suitable enclosure can be built in the garage for large tortoises that need to spend a few months indoors during the winter. These enclosures should be heated enough to keep the tortoises comfortable during the indoor months. Photo Credit: Tyler Stewart. Sulcata tortoise hatchlings.

Sulcata Tortoise Care Sheet - Reptiles Magazine

Leopard Tortoises are herbivorous, but their diet differs from other tortoises, because they eat forbs (e.g. seeds, grains, and nuts) rather than greens and grasses. In the wild, they spread these seeds over their home territory, which helps to grow plants.
