The three ways to switch from between user-mode and kernel-mode in a general-purpose operating system are in response to a system call, an interrupt, or a signal. A system call occurs when a user program in user-space explicitly calls a kernel-defined "function" so the CPU must switch into kernel-mode.

## **Operating System Concepts - 9th edition**

We provide solutions to the Practice Exercises of the Ninth Edition of Operating System Concepts , by Silberschatz, Galvin and Gagne. These practice exercises are different from the exercises provided in the text. (Solutions to the exercises in the text are available only to instructors.) Students are encouraged to solve the practice exercises on their own, and later use the solutions to check their own solutions.
