Toyota and Lexus V6 cold start engine rattle - 2GR/3GR/4GR. The first cold start of the morning some Toyota and Lexus V6 owners, especially those who have the 2.5L or 3.5L V6, notice a loud rattle the first few seconds after startup. The noise disappears after the car builds oil pressure. The most common cause is the variable valve timing camshaft gear assembly leaking down oil pressure as it sits.

2GR-FE/FSE/FKS Engine Problems and Reliability. Toyota conducted a recall campaign for cars with 2GR-FE and 2GR-FSE produced until 2010. The reason for that became a problem with an oil leak from the rubber hose which feeds the VVT-i lubrication system. The manufacturer replaced that rubber part by a metal pipe.

2. "Normal Clatter"; The VVTi didn't-get-my-pin-in-place-at-shutdown noise that many know and love. 3. "injector clatter"; a rapid tickety-tick that is always in the background, louder when the engine is cold, and more audible after #1 and #2 quiet down. It's the only noise that probably is truly normal.
